

Video Review Of The Smith & Wesson M&P 45 Shield

With Smith & Wesson's long five star track record for it's subcompacts, they made a new member for the M&P Shield line. To bad Glock was late in to the single stack subcompact class. I've been carrying the Shield in 9mm for 3 years and I love how accurate it shoots, recoil feel, reliability, grip and concealed carrying.

Please comment your thoughts after watching this video.

Should the Shield 9 and 40 get the same trigger as on the new 45 Shield?
