

Woman Defended Herself From Being Rape With a Knife

For you fella ladies out there.

Thumbs up for this lady who decided not to be a victim. Learn how to use a knife to save yourself from being attack by a boogieman. In some situations a gun might not be the right tool for various reasons. I recommend carrying the Ka-Bar TDI straight knife in the Phlster sheath on your hip or appendix position for easy access and rapid deployment. In today's world this can happen to anyone anywhere, keep your head up!
